

MUHAMMAD HARIS AL FIKRI

Frontend Developer

Indonesia | [+6282225384814](tel:+6282225384814) | muhammadharisal259@gmail.com | [Linkedin](#) | [github](#)

An enthusiastic professional with a deep command of core JavaScript principles (ES6+, async patterns) and a strong focus on technical SEO and UI/UX optimization. I leverage my understanding of memory management and browser rendering to build high-performance applications that are both search-engine friendly and visually engaging. Skilled in translating complex design requirements into responsive, scalable code, I ensure every solution delivers exceptional user experiences while maximizing organic reach.

WORK EXPERIENCE

Frontend Engineer - Volantis Technology *August 2024 - March 2026(On-site)*

- **Spearheaded code refactoring initiatives** by migrating legacy code to modern JavaScript/TypeScript, which improved maintainability and reduced page load time by **30%**.
- **Collaborated directly with C-level executives** to align technical development with business goals, implementing Technical SEO strategies (SSR/Meta Tags) that increased organic traffic by **20%**.
- **Optimized web performance** (Core Web Vitals) achieving a Google Lighthouse score of **90+** for performance and accessibility.
- **Developed scalable frontend architectures** using **Svelte & React**, ensuring high-quality user interfaces that support complex user interactions.

Frontend Web Developer - PT. Cakra Radha Mustika *April 2022 - March 2023 (Remote)*

- **Transformed complex UI/UX designs** into pixel-perfect, responsive web applications using **React & Next.js**, ensuring 100% compatibility across mobile and desktop devices.
- **Integrated over 10+ RESTful APIs** in close collaboration with the backend team to enable dynamic data visualization and seamless user flows.
- **Executed agile development cycles** to deliver high-priority features on schedule, maintaining code quality through rigorous Git workflow and peer reviews.

- **Resolved critical frontend bugs** and optimized asset loading, resulting in a smoother user experience and reduced bounce rates.

EDUCATION

Purwadhika Digital Technology School - Fullstack Web Development (2024) *grade : 85.97*

- Mastered project lifecycle management using Agile principles.
- Developed a strong understanding of team collaboration tools and processes.

Universitas Terbuka - Sistem Informasi (2024 - 2027) *grade : 3.85*

- Focusing on core concepts of information management, database systems, and IT infrastructure.
- Applying theoretical knowledge to practical, technology-driven problem-solving scenarios

SKILLS
